Allen-Bradley 200R Industrial Computer with Windows XP

Attention Brown Thermoforming Customers

Allen-Bradley has announced that a last purchase date of September 30th, 2016 has been set for the 200R Industrial Computer with Windows XP. This unit has provided Brown customers with many years of reliable use, functionality, and consistency. It was widely used on Brown equipment between 2007 and 2014, with XP on the previous Allen-Bradley Industrial Computer dating back to 2004.

With the Industrial Computer as a center piece of your machine control, it is important that you understand Brown's commitment to supporting you. **To avoid any production interruptions, we highly recommend that you consider the following on a proactive basis and contact our Spare Parts Department to fully understand your alternatives:**

1. Awareness within your organization of the discontinued availability by Allen-Bradley of the 200R with Windows XP.
2. Purchase a spare 200R with Windows XP, Brown part number 566-10533.
3. Understand your upgrade options with Windows XP to one of Brown's Windows 7 alternatives.
