

Extreme Performance Outperforms the Competition

Customer Tested & Approved

"Over 5,000 hours on the Brown Quad thermoformer and I still haven't removed a link; prior to that I tried everything to find a set of chains that would last more than 4,000 hours before completely replacing.

Extreme Performance is the only Pin Chain I'll be using on our thermoforming machines going forward."

Thermoforming Pin Chain

Brown Machine worked hand-in-hand with German chain manufacturer, IWIS, to design and manufacture the most durable pin chain on the market. This chain is available in two grades: Extreme Performance (Premium) & Standard (Economy). These chains replace Brown's previous standard offerings at **NO** additional cost.

Features	Extreme Performance	Standard
Precision ground side sharpened points for optimal piercing	X	
Special pin treatment for extended wear life	X	
Solid roller	X	X
Pre-stretched for minimum break in period	X	X
10' boxes standard <i>(Assembled lengths available upon request)</i>	X	X
Length / tolerance matching at no charge for parallel running	X	X
Common configurations in stock for same day shipping	X	X

At Brown Machine and Lyle Industries our emphasis is to exceed your expectations and present advantages that allow you to compete at a higher level.
