## **EPCO Machinery Remanufacturing and Repair Services Fully Integrated Into Brown Machine in Beaverton, Michigan**

EPCO, one of the largest remanufacturers of plastic injection, blow molding and die cast machinery, is now fully integrated within Brown Machine. Production has been completed on several machinery remanufacturing and rebuilding projects on both injection molding and die casting equipment at Brown's facility in Beaverton, Michigan.

For their in-house rebuilding and remanufacturing services, the move has allowed EPCO to capitalize on Brown's 172,000 square foot manufacturing facility, which includes large machine assembly bays, an extensive machine shop and state-of-the-art spare parts manufacturing cell. EPCO is also drawing on Brown's engineering and service expertise, with 15 engineers and 12 service technicians to supplement EPCO's existing engineering and service groups.

In response to customer demand, EPCO continues to focus on "Plant Services," offering complete machinery rebuilding at a customer's location. Other services include; component rebuilding, control upgrades, facility and equipment relocation, safety audits and comprehensive scheduled maintenance programs. EPCO also offers an extensive 24/7 parts inventory for plastic injection molding machinery, blow molding machinery, and die casting machinery and a service hotline.

Since 1959, EPCO has been helping machinery owners keep their investments up-to-speed, producing at maximum capacity, and state-of-the-art. Brown Machine is a global leader of thermoforming technologies, and engineers and manufactures a complete line of continuous and cut-sheet thermoforming equipment and related tooling/peripheral equipment. EPCO and Brown Machine first became affiliated in 1980. Since then, the two companies have worked together sharing engineering, manufacturing and technical expertise to serve the companies' diverse customer base.

Brown Machine LLC, Beaverton, MI, is a global leader of thermoforming technologies, and engineers and manufactures a complete line of continuous and cut-sheet thermoforming equipment and related tooling/peripheral equipment. Brown has designed and developed numerous thermoforming innovations over the last 55 years and has machines operating in over 65 countries worldwide.
